MetalliCards are available in aluminium or stainless steel to meet a wide range of labelling requirements. The chrome-coated aluminium tags are the inexpensive alternative for a variety of applications, and in particular, they prove themselves through the deep contrasts of their multi-colour print.

In the technologically demanding chemical and process industries, you are on the safe side when using the stainless steel MetalliCard with its outstanding resistance characteristics. Its formats cover the needs of the entire system-identification spectrum. Whether small equipment or type plates, they ensure high-quality marking processes. The MetalliCard also offers optimum installation characteristics. MetalliCards can be used universally thanks to various fixation options: bonding, riveting, with tag holders or rails, or in combination with stainless steel cable ties.

For custom printing: Please send us a file of our labeling software M-Print PRO or M-Print PRO Online (without installation) for your labeling specifications.

General ordering data

Version	MetalliCard, Device markers, silver
Order No.	1327750000
Type	CC-M DIA 30 AL
GTIN (EAN)	4050118132625
Qty.	200 pc(s).

Technical data

Dimensions and weights

Depth	0.5 mm	Depth (inches)	0.02 inch
Diameter	30 mm	Net weight	0.95 g

Temperatures

Operating temperature range	-55...130 °C
-----------------------------	--------------

General data

Colour	silver	Material	Chrome coated aluminium (AL)
Number of markers per combination	1 MetalliCard = Device markers	Operating temperature range	-55...130 °C
Operating temperature range, max.	130 °C	Operating temperature range, min.	-55 °C
Recommended industries	Energy, Process	Size of labelling field	28.2 x 28.2 mm

Device markers

Diameter	30 mm	Drill-hole diameter	4.2 mm
----------	-------	---------------------	--------

Classifications

ETIM 6.0	EC001288	ETIM 7.0	EC001288
