

ECONO RANGE

T10 On-Delay Timer

Description

The T10 is an economical single function, single time range timer.

FEATURES

- Single function / single time range / single voltage
- Potentiometer adjustable time setting
- Repeatable deviation: < 1%
- Power supply ON and Relay ON LEDs
- Output 10A SPDT

Mode of Operations

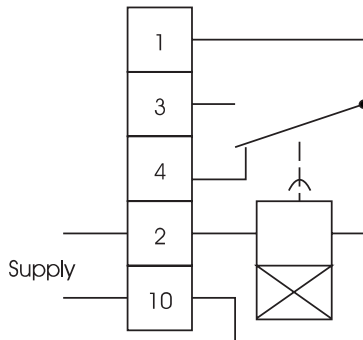

On Delay

When applying supply the relay is de-energized and timing starts. The relay only energizes after the set time is elapsed and will remain so until the supply is removed.

Example

- Delaying energization of a load on applying power.
