7T series - Snap action thermostatic bimetal sensor (used to control temperatures within enclosures)

Bimetal thermostats to control temperatures inside enclosures. Suitable for different applications, with close-on-rise (NO) or open-on rise (NC) contact for regulation of heating and ventilation equipment or to activate signalling devices.

- Small, compact size, 17.5 mm wide
- Enclosure PA66 self-extinguishing to UL 94V-0
- DIN rail (EN 60715) mountable
- IP20 protected screw terminals
- Applied standards EN 60730-1, UL approved UL873 and C22.2

7T series electronic hygrostat humidity control

Hygrostats automatically regulate humidity inside enclosures, triggering a heater or fan when a preset relative humidity is exceeded, prevents condensation on internal electric and electronic components

- Electronic multi-functional control of temperature and humidity (4 functions)
- LED status indication (contact ON)
- Humidity range: 10...90%

7F series - Filter Fans (IP54) (EN 60529)

New filter fan range from Finder ensures performance of internal components and instrumentation. Dedicated to maintaining a constant temperature in control panels and enclosures.

- Complete fan - with mounting frame, removable filter and metal finger guard
- Very low acoustic noise - minimal depth within enclosure
- Time-saving installation and maintenance - easily replaceable filter mat

Exhaust filter without fan - used as outlet or inlet

The exhaust filter should match the size of the filter fan to achieve optimal ventilation within the cabinet

7H series - Panel heaters (anti-condensation)

For the thermal regulation of electrical cabinets. The heaters consist of a self-extinguishing PTC element in a touch safe, DIN rail mountable housing.

- Compact dimensions - DIN rail mounting - touch safe - self-regulating PTC resistance
- Screw terminal connection (250/400W heaters supplied with fast wiring screwless terminals)
- Complies with standards: IEC/EN 60335-1 and IEC 60004-1
