

With its incremental optical encoder and industrial design, this rugged transducer provides the highest accuracy and longest life of any measurement device of its kind. For measurements up to 60 inches, this model is available in a variety of resolutions and output stages to fit virtually any requirement.

The PT8150 offers numerous advantages over other industrial-grade sensors: It installs in minutes by mounting its body to a fixed surface and attaching its cable to the movable object, fits into areas unsuited for rod-type measurement devices, and works without perfect parallel alignment.

Output Signal

PT8150

Cable Actuated Sensor Heavy Industrial • Incremental Encoder

Linear Position to 60 inches • 1250mm (metric range)

Aluminum or Stainless Steel Enclosure Options

VLS Option to Prevent Free-Release Damage

IP67 • NEMA 6 Protection

General

Full Stroke Ranges	0-30, 0-60 inches, 0-625, 0-1250 mm
Output Signal	incremental encoder (quadrature)
Accuracy	± 0.04% full stroke
Repeatability	± 0.02% full stroke
Resolution	20 to 500 pulses per inch
Measuring Cable	stainless steel or thermoplastic
Enclosure Material	powder-painted aluminum or stainless steel
Sensor	optical encoder
Maximum Retraction	see ordering information
Acceleration	
Weight, Aluminum (Stainless Steel) Enclosure	3 lbs. (6 lbs.), max.

Electrical

Input Voltage	see ordering information
Input Current	see ordering information
Output Driver Options	see ordering information

Environmental

Enclosure	NEMA 4X/6, IP 67
Operating Temperature	0° to 160°F (-17° to 71°C)
Vibration	up to 10g to 2000 Hz maximum

PT8150

Heavy Industrial • Incremental Encoder

*-applies to stainless steel enclosure only.

Cable Guide Options:

G order code:

**important! – bellows limits measuring cable travel to 25 inches, contact factory before ordering.*

VLS Option - Free Release Protection

The patented Celesco Velocity Limiting System (VLS) is an option for PT8000 Series cable extension transducers that limits cable retraction to a safe 40 to 55 inches per second.

The VLS option prevents the measuring cable from ever reaching a damaging velocity during an accidental free release. This option is ideal for mobile applications that require frequent cable disconnection and reconnection. It prevents expensive unscheduled downtime due to accidental cable mishandling or attachment failure.

VLS is NOT available for medium and high cable tension options, stainless steel enclosure, cable bellows or 2, 5 and 15-inch stroke ranges.

How to Configure Model Number for VLS Option:

VLS8150 -	-	1	1	-	-	-	-
	B	A	B	C	D	E	F
0030		1	1	1	1	1	0
0060		2	2	2	2	2	1
0625		3	3	3	3	3	3
1250		4	4	4	4	4	

■ = available options**

creating VLS model number (example):

1. select PT8150 model **PT8150-0060-111-1110**
2. remove "PT" from the model number **~~PT~~ 8150-0060-111-1110**
3. add "VLS" **VLS + 8150-0060-111-1110**
4. completed model number ! **VLS8150-0060-111-1110**

***Note: please contact factory for a solution to options not supported.*
